We're Problem Solvers

$(a_1, a_2, \dots, a_n) = \sum_{i=1}^n a_i$
 $n=0$

$$f : X \rightarrow Y$$

consectetur adipiscing elit
sine causa fieri nihil putandum
Quarum ambarum rerum cum
medicinam pollicetur, luxuriae

A man with glasses and a dark polo shirt is adjusting the head of a white humanoid robot. The robot has a friendly-looking face with large eyes and a small mouth. The man is looking at the robot's head with his hands near the neck area. The background is dark, and the scene is lit with a soft blue glow.

Managing \neq Engineering

Managing is not Engineering

Engineering

- Your ability to solve problems
- Your ownership of how problems are solved
- Your execution of tasks
- Your ability w/ code discussing elit. Quorum sine causa fieri nihil putandum est. Quorum ambarum rerum cum
- Your taking ownership, responsibility, autonomy, control, execution

Managing

- Your ability to create problem solvers
- Your employees' ownership of how problems are solved
- Your employees' execution of tasks
- Your ability w/ people
- **Your *giving* of ownership, responsibility, autonomy, control, execution**

Ownership, Responsibility,
Autonomy, Control, Execution

A close-up shot of Steve Carell as Michael Scott from the TV show 'The Office'. He is wearing a dark blue suit, a light blue striped shirt, and a dark tie with light blue stripes. He has a confused expression, with wide eyes and a slightly open mouth. The background consists of white horizontal blinds. The text 'Uhh What...?' is overlaid on the right side of the image in a white, sans-serif font.

Uhh What...?

Manage the Environment

Task Execution / Social / Mental

01 Task Execution Environment

- “Limits or boundaries of what is allowed to happen”
- Domain invariants
- Quality standards
- Timelines

consectetur adipiscing elit. Quorum
sine causa fieri nihil putandum est.
Quarum ambarum rerum cum
medicinam pollicetur, luxuriae

02 Mental Environment (rational and emotional)

- What are their motivations/aspirations?
- Do your employees know your expectations?
- How do your employees view domain issues and potential solutions?
- Why do your employees make the decisions they make?
- Do your employees know if you like their work?
- How would your employees change their role?
- Are they happy?

03 Social Environment

- What is the culture of the team[s]?
- Is your team diverse? Accepting and made of races, religions, orientations, sexes?
- Do you permit or enable sexism?
- Do your employees feel comfortable sharing ideas?
consectetur adipiscing elit. Quorum
sine causa fieri nihil putandum est.
- **Are your employees scared of making a mistake?**
medicinam pollicetur, luxuriae

“What do you think?”

a.k.a., the most important question to ask about everything

“Given [task execution limits],
how do you think we should
_____?”

A leader is best

When people barely know he exists

Of a good leader, who talks little,

When his work is done, his aim fulfilled,

They will say, "We did this ourselves."

sine causa fieri nihil putandum est.

-- Lao Tzu, Tao Te Ching
